

REJUVENATE CREAM

Rejuvenate Cream
Treatment Size ¼ tsp
2-Month Supply Per container

Ingredients: 0.3% estriol in a base of purified water, methyleulfonylmethene, glyceryl stearate, sunflower oil, stearic acid, coprylic/cepric triglyceride, plant glycerin, lavender oil, cedar wood oil, xanthan gum citrus limonum.

DIRECTIONS: For best results, apply Approximately ¼ tsp to face and neck one time per day or as directed by physician.

ANTI-AGING ESTRIOL FACE CREAM

- Reduces Wrinkles
- Diminishes Pore Size
- Improves Skin Elasticity
- Increases Skin Collagen Content
- Rejuvenating, Tonic Effect on Skin of the Face / Neck
- No Systemic Side Effects, Local Effect Only
- Delivers the safest estrogen fraction to the skin's estrogen receptor

REJUVENATE CREAM: Supplies safe, plant-based, bioidentical estriol to support the collagen matrix underlying the skin. The result may be firmer, smoother more supple skin.

ESTRIOL is a plant-based bioidentical estrogen, the safest of the estrogen fractions, which stimulates estrogen receptors that lose tone with aging. Regular use of estriol strengthens the underlying collagen structure of the skin. Studies show that after treatment for six months, wrinkle depth and pore size decrease by 61.100%

MSM (methylsulfonylmethane) is an organic sulfur compound that has been shown in studies to be a permeability enhancer. It has been used as an excipient to facilitate transport across biologic membranes to enhance delivery of compounds to specific local tissue sites. As such, it is an excellent vehicle to carry the estriol to the target tissues. In addition, research has shown that topically applied MSM is useful for reducing oxidative stress, inflammation and swelling. In one animal study, topical administration of MSN inhibited lipopolysaccharide-induced inflammatory responses through the down regulation of NF-kappaB signaling. Together these physiological functions make MSM an ideal ingredient to include in an anti-aging face cream. Physician developed estrogen face cream delivers the safest estrogen fraction to estrogen deficient receptors in the face and neck.

“Estrogen compounds were shown to be effective in the treatment of skin-aging symptoms of perimenopausal women” - International Journal of Pharmaceutical Compounding.
